

CAMPUS SPACE UTILIZATION TASK FORCE

Introduction

The Campus Task Force on Space Allocation and Utilization presents the following report on its findings to Dr. John Nader and Vice President Greg O'Connor. This report represents the product of the efforts of the Task Force in fulfilling President Nader's Draft Charge of December 13, 2017, by means of direct inspection of facilities, collection of data from numerous sources, analysis of our results, and evaluation of proposals over a series of meetings during the months since receiving this charge.

It is recognized that total enrollment at the college will continue to increase going forward, with projections of 1.5% increases over the next two years. There is a high probability of approval of additional programs at both the undergraduate and graduate level that will result in continued increases of enrollment, and there will be a corresponding need to hire additional faculty and staff to provide instruction and to support the increasing numbers of students and faculty in meeting the mission of the institution. At the same time, the prospects for construction of additional classroom buildings and office facilities in the near future to accommodate this growth are not favorable. This makes it necessary to introduce substantial changes in a range of campus policies and procedures to improve efficiency of utilization of campus time and space.

Although this Task Force can offer recommendations for these changes, the challenge will be to communicate the need and to gain the cooperation of the campus community in adopting and embracing these changes. Further, those recommendations that would have an impact on academic programs of the college are not intended for implementation without full consultation with the leadership in Academic Affairs, including department chairs, deans, and the provost.

Submitted to President Nader and Vice President O'Connor by the members of the Campus Task Force on Space Allocation and Utilization on May 23, 2018.

CAMPUS SPACE UTILIZATION TASK FORCE

Documents

The Task Force report is organized into several sections to address the topics that were itemized in the Draft Charge and that were raised in additional communications from President Nader to the Task Force.

A.1 OPERATIONAL ASSESSMENT

Academic Planning to Improve Utilization, responding to the points (shown in italics) raised in President Nader's notes of 2/12/18.

Those questions and recommendations raised in President Nader's notes of 2/12/18 that pertain to academic planning to improve space utilization have been addressed in the following report. We have deliberately skipped those questions and recommendations that are outside the realm of academic planning, as shown by skipped numbers in the following itemized list of responses.

The recommendations that follow are not intended for implementation without full consultation with the leadership in Academic Affairs, including department chairs, deans, and the provost.

- 1) *How many added classrooms?* None are needed near-term based on the following:
 - a) Improvements in numbers of classrooms are currently available or underway:
 - i. Addition of 2 classrooms in Gleeson Lower Level as of the fall of 20018 will add to the number of available rooms.
 - ii. Utilization of School of Business Building classrooms for general use as of the fall of 2017 resulted in an increased number of available rooms.
 - iii. Improved assignment of sections to classrooms based on section size that will be facilitated by the planned implementation of Event Management Software for the campus.
 - iv. The detailed inventory and analysis of classroom utilization presented in Section B.2 below shows the potential for improved utilization of some of these rooms that Event Management Software could provide.
 - b) Additional improvements that could be achieved in a relatively short period of time:
 - i. Upgrade any non-TEC's (Technology-Enhanced Classrooms) to TEC's (and update aging systems in existing TEC's) so that all classrooms are TEC, reducing competition for existing TEC's. The specific non-TEC classrooms that require upgrading to TEC's are the following, with notes on those for which such upgrading is planned for the summer of 2018:
 1. GLSN L100
 - a. to be upgraded to TEC summer of 2018
 2. LUPT 113 (Drafting Lab)
 - a. to be upgraded to TEC summer of 2018
 3. LUPT 233
 4. LUPT 239
 5. LUPT 242
 6. LUPT 268 (Architecture & Construction Drafting Lab)
 - a. to be upgraded to TEC summer of 2018
 7. LUPT 274 – (Architecture & Construction Drafting Lab)
 - a. to be upgraded to TEC summer of 2018
 8. THOM 113
 9. WHIT 159
 10. WHIT 251

- ii. Make use of unused wired rooms in Sinclair Hall by making them TEC for general use. In addition to this upgrading, at least one of these wired rooms could be made into an additional instructional computer lab for general use. Long-term plans for Sinclair Hall classrooms will be subject to academic division priorities to be determined by the Provost.
 - iii. Designate conference rooms as classrooms to be used for seminars and other low-enrollment sections to free up regular classrooms for larger sections
 - 1. This will require a change in the room classification of these conference rooms, apparently requiring action by Physical Plant and the Registrar.
 - 2. This usage of conference rooms will also require coordination between Use of Facilities and the Registrar, including the establishment of dedicated time periods throughout the week for this purpose.
- c) Implement dual-utilization of some underused wet labs (and possibly some instructional computer labs and drafting labs) to serve as additional classrooms
- i. This would only be possible in the case of general-purpose labs without specialized equipment.
 - ii. And this would require addition of suitable seating for students in many of these labs (adjustable stools with back support).
- 2) *How many added labs or lab space?* Depends on the type of lab:
- a) Additional/Alternate Wet Labs (including suggested BHBP labs): None are needed near-term. Some observations and proposals on wet lab availability are:
 - i. Analysis of usage. A detailed inventory and analysis of instructional laboratories is presented in Section B.3 showing the numbers of laboratory sections/week scheduled into each room. This report shows wide variation in utilization of current lab space, some of which is justified by the specialized nature of certain laboratories dedicated to specific programs. However, there appears to be sufficient capacity to permit scheduling of additional sections into a number of these laboratories.
 - ii. Thompson 125 could be returned to wet lab usage, possibly for use by Urban Horticulture & Design (this room previously served as Food & Nutrition Kitchen; Medical Microbiology Lab).
 - iii. Broad Hollow Bioscience Park is unfeasible as an alternate location for additional wet labs without major renovation.
 - iv. However, if BHBP were to be utilized for faculty research:
 - 1. This would make it possible to transfer the Physics Research Lab (Lupton 235) to BHBP
 - 2. This would free up Lupton 235 for use as advanced/specialized Chemistry courses (e.g. Analytical Chemistry, Physical Chemistry).
 - b) Instructional Computer Labs: Additional open lab access is needed to meet student demand and accreditation standards.

MOTORCYCLE PARKING LOT EXTENSION STUDY 3

APRIL 4, 2018

LOSS OF 18 EXISTING PA
PROPOSED PARKING SPA
NET GAIN OF 48 ADDITIO

2. Offers potential of creating certificate/micro-credential courses in this format.

d) *A M/W/F and T/R schedule:*

- i. M/W/F scheduling is unfeasible given our student population and scholarship demands on our new faculty.
- ii. Variable lengths of meeting times have been proposed, but represent a challenge for coordinating with existing scheduling grid.
- iii. A brief report on current scheduling patterns by day of the week and by class period of the day is presented in A.2 OPERATIONAL ASSESSMENT Weekly and Hourly Distribution of Course Sections. This report provides a picture of current patterns of usage as a guide to possible adjustments to improve efficiency of utilization of available instructional space.

e) *Review # and frequency of electives:*

- i. Proposed action: reduce the frequency and/or the number of sections/semester of low-enrollment elective courses, thus encouraging adequate enrollment into remaining available sections. If specific elective courses are required to maintain the integrity of certain programs and to enable students to graduate in a timely manner, it would be recommended that any low-enrollment sections of such courses be scheduled into rooms with a correspondingly smaller capacity. The utilization of conference rooms described above in 1)b)iii above would facilitate such scheduling.

f) *Additional proposals within the area of scheduling to be considered:*

- i. Review enrollment caps for various courses while maintaining the student/faculty interaction that attracts students to the college.
- ii. Evaluate the justification for unusually low section sizes, both face-to-face and online, and address this issue by one or more of the following steps:
 1. Reduce the number of sections and/or the frequency of offering of courses that show this pattern.
 2. In cases where such sections are in courses needed for graduation of majors, explore other options for student learning in the subject matter, such as completion of independent student research projects or enrollment into an Internship section.
- iii. Bring hybrid section enrollment caps in line with face-to-face class enrollment caps.
- iv. Evaluate the use of pedagogical methods and techniques to facilitate a higher enrollment cap for online courses than is currently applied (while ensuring course quality and observing Middle States standards for quality interaction between faculty and students in this format).
- v. Adopt the “2 lab sections/1 lecture section” model (used by Biology and Chemistry) for all of the Natural Sciences.
- vi. Explore the utilization of Virtual Labs for non-majors’ courses in which lab technique is not a learning objective, thus freeing up lab space currently utilized for such courses (this will require a philosophical shift in the Natural Sciences!).

- vii. Consider the use of “Freshmen Fridays” on which many of the General Education and other basic requirements that freshmen need could be scheduled. Freshmen carry the lightest workloads and therefore may be better able to take Friday classes.
- 4) *Ongoing space review to identify available space and sub-optimal uses.* Proposals to achieve this include:
 - a) Utilize Event Management Software to monitor the efficiency of usage of classroom and laboratory space.
 - b) Maintain a Campus Space Utilization Task Force (or appointed Committee) that will conduct an annual review of utilization of campus space and make recommendations to correct for both unnecessary allocations and shortages of space for adequate functioning of academic and support programs.
 - c) Continue an information campaign to make the campus community aware of the need for changes in campus culture regarding occupation of space so that there is acceptance of steps that are needed to address this.
- 5) *Recruit for a more narrow range of programs?* There are several proposals related to the general issues of recruitment to be considered:
 - a) Link enrollment targets and related action items with each other so that there is a rational institutional plan for ensuring that there are sufficient faculty and support staff to meet the anticipated demand.
 - b) Implement Admissions policies to prevent overshooting enrollment targets to such an extent that there are unanticipated capacity issues. Moving away from a rolling admissions policy and implementing an earlier admissions deadline would prevent over enrollment and provide the opportunity to admit the strongest applicants in the pool.
 - c) Plan enrollment targets and caps at the institutional level, taking into account specific limits on enrollment into programs that are based on accreditation standards, availability of clinical sites, or capacity of specialized instructional laboratories.
 - d) Maintain regular communication between Admissions and Academic Affairs (including academic departments and schools) to ensure that recruitment efforts are in line with planned enrollment growth of new programs.
 - e) Invest recruitment efforts toward building enrollment in new programs that are less familiar to the student market, rather than encouraging large numbers of additional admissions into programs with high current enrollments. At the present time, the majority of recruitment events consist of attending organized college fairs at high schools, community colleges, SUNY events and national fairs. A combined recruitment effort involving both admissions and faculty should be explored to focus on introducing new and under enrolled programs to prospective students. With the anticipated increase in non-traditional students identifying strategies to recruit and service this population also need to be explored.
 - f) Instead of focusing only on a generalist approach to recruitment, have recruitment specialists dedicated to programs that require a particular knowledge set to be able to appropriately represent emerging or existing disciplines to high school students who may not be familiar with them or with the career opportunities they lead to. (Examples are Geographic Information Systems, Applied Gerontology,

Interaction Design, and Professional Communications.) Providing additional opportunities for prospective students to interact with current students and faculty in new programs should be explored.

6) *Reduce non-matts/part-time?*

- a) Given that non-matriculated students are currently restricted to registering after all matriculated students have had ample opportunity to register, their enrollment is seen as more beneficial than disruptive in terms of filling sections with low enrollment.
- b) Some accommodation of non-matriculated students serves as a recruitment tool, especially in that it provides an avenue for admission of matriculated students into certain academic programs (e.g. there is a considerable population of non-matriculated students taking Human Anatomy & Physiology who are seeking admission to Nursing and other programs in the School of Health Sciences).
- c) Since part-time students are matriculated, and often have to extend their time to graduation for economic and personal reasons, their enrollment does not detract from the mission of the college.

8) *How many more faculty?*

- a. Hiring plans are developed a year in advance, based on anticipated need according to projected growth of programs and approval of new programs.
- b. A recognition of the need to reserve office space in academic buildings for full-time faculty rather than for adjunct faculty has resolved one of the obstacles to hiring new faculty.
- c. Section C.1 below provides a detailed inventory of campus office spaces with current occupancy, and Section C.2 presents an analysis of office space utilized for full-time and adjunct faculty within the School of Arts & Sciences with a plan for eliminating the latter usage to accommodate the hiring of additional full-time faculty in the departments within this School.
- d. As pointed out above in 5.a., planning for hiring of faculty and support staff should be linked with institutional growth plans so that an adequate full-time faculty/student ratio can be achieved.

9) *Create partnership programs with NCC/SCCC to deliver upper division of programs off the FSC campus?* Conversations with our counterparts at Nassau CC have engendered some interest in developing agreements around targeted programs. Details are still to be determined. A preliminary meeting has been scheduled for June 20th with our counterparts at Suffolk County CC to explore possibilities for a similar arrangement on their campuses.

Longer term case—reaching 10,500 students, 2020: Could we/should we focus growth in online/hybrid, off-site and grad level programs?

- 1) *Explore and implement expanding offsite options with community colleges. This requires dedicated coordination*

- a) This seems like a good idea for targeted programs or departments where the majority of their classes could be taken in the offsite location and if we could build course schedules that allow students to be at the offsite location for certain days and at the FSC home campus on other days.
- 2) *Focus on online/hybrid programs*
- a) Continued focus should be placed on developing online and hybrid courses. Programs that are most conducive to the online environment should be targeted. New programs should consider this option in the development process.
- 3) *Hiring plan for faculty*
- a) Right now, we only know in the semester before we begin the hiring process what has been approved.
 - b) Provost could work with Deans to create 5-year plans rather than 1-year plans if there is financial approval.
- 6) *Review future of some academic programs? Are there some that can be reduced/eliminated?*
- a. Need to develop a team to look strategically at all programs and create a plan for the future in terms of programs that could be reduced or eliminated, but also to consider which programs would be best suited to online or alternative programming. There should also be planning on how to target the most promising undergraduate and graduate programs for development.
- 7) *More focus on grad programs?*
- Currently we are working on developing a master's program in each of the Schools of the College. As a part of that process alternative semester schedules, weekends, online and hybrid should all be considered and planned for in development. It is possible that the college could require some sort of alternative format for all graduate programs. In addition to being a space saving measure this could make the programs more attractive to working professionals.
- 8) *Move some functions to rented space off site?*
- a. This is supported. In particular there has been discussion by the Task Force about moving functions that are not directly related to academic programming and student support.
- 9) *Explore the possibility of work from home for some staff.*
- a. Some functions of the college could be achieved at a distance.
 - b. This could allow for entire functions to be completed from home or for shared work spaces where one employee is there on certain dates and times and another is available on opposite time blocks.
- 10) *Investigate having some support staff work in the evenings.*
- a. This would again allow for the possibility of shared worked spaces.
 - b. Would add coverage for departments that interact heavily with faculty and students in areas such as Distance Learning, Advisement, etc. who might need evening and/or weekend support.

A.2 OPERATIONAL ASSESSMENT

Weekly and Hourly Distribution of Course Sections

Scheduling of in-class sections over the 2017-18 academic year has been analyzed according to the distribution of scheduling on days of the weeks and class periods of the day, to serve as a reference for recommendations for changes.

Scheduling pattern by days of the week:

The data presented in the first set of three tables below show distribution for each semester for: 1) all sections by days, 2) theory sections only by days, and 3) lab sections only by days. It should be noted that the total numbers of sections on the last line in tables 1) and 2) are slightly inflated because a small number of theory classes meet three days per week, therefore they are counted in more than one category in these tables.

1) Distribution of all in-class sections (theory and laboratory) by day of the week

| Days scheduled | Fall 2017 | | Spring 2018 | |
|--------------------|-----------|----|-------------|----|
| | Number | % | Number | % |
| MW | 436 | 24 | 417 | 24 |
| M | 239 | 13 | 204 | 12 |
| W | 223 | 12 | 227 | 13 |
| TR | 403 | 22 | 380 | 22 |
| T | 197 | 11 | 192 | 11 |
| R | 164 | 9 | 173 | 10 |
| F | 136 | 7 | 99 | 6 |
| S | 27 | 1 | 18 | 1 |
| Other combinations | 17 | 1 | 23 | 1 |
| Total Sections | 1842 | | 1733 | |

The pattern of all in-class section scheduling shows an expected heavy usage of M/W and T/R patterns with 24% on M/W and 22% on T/R in both fall and spring semesters. There were a considerable number of sections meeting one day a week Monday through Thursday (10-13% of sections), but a rather low number of sections on Fridays (7% in the fall and 6% in the spring) and only 1% of sections on Saturday (largely represented by Biology). The sections reflected by "Other combinations" are primarily those in Aviation courses.

2) Distribution of in-class theory sections only by day of the week

| Days scheduled | Fall 2017 | | Spring 2018 | |
|--------------------|-----------|----|-------------|----|
| | Number | % | Number | % |
| MW | 431 | 35 | 412 | 36 |
| M | 100 | 8 | 76 | 7 |
| W | 69 | 6 | 71 | 6 |
| TR | 403 | 33 | 379 | 33 |
| T | 73 | 6 | 70 | 6 |
| R | 52 | 4 | 62 | 5 |
| F | 64 | 5 | 50 | 4 |
| S | 13 | 1 | 9 | 1 |
| Other combinations | 15 | 1 | 11 | 1 |
| Total Sections | 1220 | | 1140 | |

The largest numbers of theory sections (69%) are scheduled two days per week on Monday and Wednesday or Tuesday and Thursday. The number of one-day/week theory sections is therefore lower, and relatively similar among each of the days Monday through Friday, with most of these sections scheduled in the evening Monday through Thursday but during the day on Friday.

3) Distribution of laboratory sections only by day of the week

| Days scheduled | Fall 2017 | | Spring 2018 | |
|--------------------|-----------|----|-------------|----|
| | Number | % | Number | % |
| MW | 5 | 1 | 5 | 1 |
| M | 139 | 22 | 128 | 22 |
| W | 154 | 25 | 156 | 26 |
| TR | 0 | -- | 1 | -- |
| T | 124 | 20 | 122 | 21 |
| R | 112 | 18 | 111 | 19 |
| F | 72 | 12 | 49 | 8 |
| S | 14 | 2 | 9 | 2 |
| Other combinations | 2 | -- | 12 | 2 |
| Total Sections | 622 | | 593 | |

There is a predictable contrast between scheduling of theory sections and of laboratory sections as shown by a comparison of tables 2) and 3) above. With the exception of some Aviation courses, Molecular Biology (BIO 441L), and Introduction to Geographic Information Systems (GEO 221L), every laboratory section meets once a week. Although Fridays are used for laboratory classes in some programs (especially Biology), the majority of one day labs are scheduled Monday-Thursday.

Scheduling pattern by class periods:

The data presented in the table below show the numbers and the percentages of all on-campus sections by starting time of the class period from 8:00 a.m. to 8:45 p.m. for the 2017-18 academic year:

| Class Period Start | Fall 2017 | | Spring 2018 | |
|--------------------|-----------|----|-------------|----|
| | Number | % | Number | % |
| 8:00 | 162 | 10 | 130 | 8 |
| 9:25 | 253 | 15 | 234 | 15 |
| 10:50 | 124 | 8 | 118 | 8 |
| 12:15 | 262 | 16 | 254 | 16 |
| 1:40 | 239 | 15 | 215 | 14 |
| 3:05 | 158 | 10 | 153 | 10 |
| 4:30 | 97 | 6 | 87 | 6 |
| 5:55 | 273 | 17 | 286 | 19 |
| 7:20 | 66 | 4 | 67 | 4 |
| 8:45 | 2 | -- | 1 | -- |
| Total | 1636 | | 1545 | |

The commonly observed pattern of relatively higher usage during the "prime time" period of the day (from 9:25 to 1:40) is quite evident in the distribution of sections shown above. The impact of the Activity Period on class scheduling on Tuesdays and Thursdays is also apparent from the lower numbers (124 and 118) for the 10:50-12:05 time period compared to the preceding and following time periods. The very high numbers (273 and 286) for the 5:55 class period is notable, and reflects the continuing importance of evening classes as a component of the academic day. Of the 66-67 sections starting at 7:20 in the evening, many are Biology lecture and laboratory classes, but there are also significant numbers of Business and Computer (BCS) classes at that time.

Aside from the 7:20 and 8:45 p.m. start times, the least popular class period for students and faculty is 4:30-5:10. The 8:00 a.m. and 3:05 p.m. class periods have comparable numbers of sections scheduled, and while getting to campus at 8 in the morning can be challenging, it is surprising to see the relatively low number of sections scheduled at the 3:05 start time. It would appear that over 100 sections could be shifted to the 3:05 class period from the mid-day time periods without exceeding the current level of usage of classrooms and laboratories. However, it should also be recognized that there are numerous laboratory courses that run for three class periods, therefore the latest that they could be scheduled in the afternoon is 1:40.

B.1 FACILITIES ASSESSMENT

Campus Buildings Data, Findings, and Recommendations

1. Alumni Hall

Year Constructed: 1950

Last Major Rehab: N/A

Gross Sq Ft: 12,569

Two story brick building constructed as a single occupancy dormitory accommodating 45 persons. Also included is a large lounge space and a four room apartment. The roof was recently replaced and a window replacement project is needed. If the building is to continue as a dormitory a fire sprinkler system is recommended.

Findings/Recommendations:

- a. If the resident population continues to decline, Alumni Hall could be converted to faculty office space without a costly rehabilitation. Could house up to 50 faculty.
- b. A window replacement project is needed.

2. Broad Hollow Bioscience Park - Building 1

Year Constructed: 2001/02

Last Major Rehab: N/A

Gross Sq Ft: 64,000

Constructed as Biotech incubator for start-up companies in the bioscience field. The main building consists of labs, offices and high-tech bioscience research space. A 14,000 sq. ft. addition housing office space and a library was added. Since the original anchor tenant left the facility it has been totally unoccupied. Some tenants have been added to Building 3. A major renovation of the HVAC system is required.

Findings/Recommendations:

- a. The bioscience park study is underway and funded by the state.
- b. The relocation of instructional laboratories from Lupton Hall to the main building has been proposed, but extensive renovations would be required before this could be implemented.
- c. The relocation of research laboratories for several programs (including Biology, Chemistry, and Physics) may be more feasible, and would enable the reassignment of currently occupied space in Lupton and Gleeson Hall to instructional laboratory usage.

3. Campus Commons

Year Constructed: 1915

Last Major Rehab: 2016

Gross Sq Ft: 13,902

One story concrete structure originally a farm machinery storage building. It also served as daycare center, campus police headquarters and food service/retail space. Currently one wing houses the Small Business Development Center. The other wing is used as storage for Aramark. It also houses an unused Solar Energy Center.

Findings/Recommendations:

- a. The Commons is slated for demolition but the Roosevelt project needs to be completed first so SBDC can move.
- b. The wing used by Aramark would need major work to be used for anything else.

4. Conklin Hall

Year Constructed: 1914

Last Major Rehab: 2016

Gross Sq Ft: 17,935

Two story brick building originally the central heating plant for the college. A total rehabilitation was recently completed and the building is now a functional student activities building. It appears to be a great success with students and is a much needed enhancement to student life. The new facility contains numerous conference rooms utilized for campus activities.

Findings/Recommendations:

- a. Use of Student Club rooms is limited due to lack of computer facilities. Recommend addition of computers and printer/s in these rooms to allow full functionality for students.

5. Gleeson Hall

Year Constructed: 1983

Last Major Rehab: 1994

Gross Sq Ft: 115,869

Four story brick building designed during the energy crisis of the 1970s but not built until early 1980s. Original building occupants suffered from 'tight building syndrome' and the building underwent total renovation to make it functional.

Findings/Recommendations:

- a. Current state of building:
 - Renovations to lower level are now complete and provide a new home for the campus Instructional Technology Support Department and two additional classrooms.
 - Two critical maintenance projects, Window Replacement and HVAC upgrade are in the planning stages and will be quite disruptive to the operation of the building.
- b. Recommended internal reconfigurations:
 - Room 247 Deans Suite is large and underutilized – could be reconfigured to provide possible additional office space.
 - Add faculty office in Rm 204, adjacent to 205, similar to office next to 206.
 - Rm 311 underutilized – convert to Health Sciences office.
 - Convert room 354 to a corner office similar to recent construction of room 242.
- c. Longer-range projects:
 - Relocate Criminal Justice labs 310, 312 to Sinclair to allow for nursing lab expansion
 - Labs 349 and 350 (old DNA labs) are currently utilized by Biology faculty for research activities. If these research labs were transferred to the Broad Hollow Bioscience Park, these rooms could be utilized as instructional laboratories if there were programs that could make use of them.
 - The office space between 349 and 350 is currently used for Pre-Health Science Advisement. This program has grown to such an extent that it requires dedicated office space in another building (Greenley Hall?), and if that were implemented this space would become a general-use office.

6. Greenley Hall

Year Constructed: 1972

Last Major Rehab: 2016

Gross Sq Ft:

Four story brick and concrete structure constructed as a Library and Instructional Resource Center. In the 1980s the campus main frame computer operation was moved to the lower level. In 2015 a major reconstruction of the main and second floor converted outdated library space into a state of the art Information Commons. Books and Beans, the retail food operation located in the lobby, was also recently renovated.

Findings/Recommendations:

- a. Current state of building:
 - Renovation of 3rd floor now underway.
- b. Recommended internal reconfigurations:
 - Better utilize excess space in periodical stacks, relocate book storage from 117 to periodical area.
 - Consider Lab 105 as end of semester testing
 - Rm 112 could be renovated for office space.
- c. Longer-range project:
 - Possibly move AAIC to Knapp after renovation of kitchen area in that building

7. Hale Hall

Year Constructed: 1967

Last Major Rehab: 2011

Gross Sq Ft: 89,225

Two story reinforced concrete structure that received a total rehab in 2010. It houses both the Visual Communications and Biology Departments.

Findings/Recommendations: The building is in excellent condition and no major rehab projects are planned at this time.

8. Hooper Hall

Year Constructed: 1920

Last Major Rehab: 1960

Gross Sq Ft: 15,934

Three story brick building with basement. Originally constructed as the men's dormitory. Converted to office and class/lab space for Long Island Educational Opportunity Center (LIEOC).

Findings/Recommendations:

- a. Relocate LIEOC to off campus facility. This would allow Hooper to serve as a faculty office building that could accommodate 40 faculty.
- b. Exterior of the building could use renovations similar to those recently completed in Ward Hall. Interior is also in need of rehabilitation.

9. Horton Hall

Year Constructed: 1953

Last Major Rehab: 1982

Gross Sq Ft: 22,046

Two story brick building originally served as classroom/lab building for poultry research. A 1980's rehab converted it to an administration building housing Executive Offices.

Findings/Recommendations:

- a. Exterior renovation recently completed and a complete HVAC renovation is in design.
- b. The growth of the college has put a strain on the space available in this facility.
- c. The upcoming HVAC project will be extremely invasive and may require temporary relocation of the entire staff.
- d. Relocate Use of Facilities office, possibly to Ward Hall
- e. Relocate Research Foundation, possibly to Ward Hall or possibly Thompson to be in proximity to other research offices
- f. Relocate Web Programming Offices, possibly to Ward Hall, to free up office space for Design Department staff currently in Laffin Hall.

10. Knapp Hall

Year Constructed: 1936

Last Major Rehab: 2018

Gross Sq Ft: 45,762

Originally constructed as the main campus dining facility with dormitory rooms located on the second floor. It now houses faculty offices on the second floor. The main floor has the University Club on the north side and STEP/CSTEP on the south.

Findings/Recommendations:

- a. A renovation project is now beginning that will reconstruct the main dining space and kitchen to provide 'shell space' for a future fit-out the scope of which is now the focus of a space utilization study.
- b. Construction underway on first phase of kitchen conversion. Study almost complete to determine best use of available space.
- c. Recommend utilizing renovated space for Grant Funded Programs – needs Cabinet approval
- d. Reorganize faculty office through second floor and maximize space
- e. Retain University Club space as currently utilized
- f. Consider addition of bathroom facilities in former kitchen – will be done under next phase of Knapp renovations.

11. Laffin Hall

Year Constructed: 1967

Last Major Rehab: 2001

Gross Sq Ft: 28,535

Three story brick building originally constructed as campus administration building, replacing Thompson Hall. Due to a leaking roof and delamination of sprayed on asbestos ceiling finishes, it was evacuated to allow for complete interior and exterior renovation. It came back online as a student services building.

Findings/Recommendations:

- a. This building is in excellent condition but due to growth of the college it is overcrowded.
- b. Admissions, Registrar, and Student Accounts are overcrowded.
- c. Improve floor plans and access for Student Accounts and Registrar.
- d. Improve confidentiality within Financial Aid and Student Accounts. This is not FERPA compliant as they have sensitive conversations with students in open area.
- e. Reconfigure lobby to be more useful and visitor friendly
- f. Reconfigure second floor lobby

- g. Relocate TRIO to a more appropriate location. Possibly Knapp. This space could be utilized for an Admissions Tour Room.
- h. Relocate Study Abroad/International Programs
- i. Relocate IA staff currently located in Laffin to another location, potentially to freed up space in Horton or Ward to accommodate overcrowding in Laffin.
- j. Staff the lobby reception area and cross train staff to handle all visitors and questions.

12. Lupton Hall

Year Constructed: 1952

Last Major Rehab: between 1990-2012

Gross Sq Ft: 166,175

Two story brick building built as campus Industrial Arts building. Over the past 65 years it has seen dozens of interior renovation projects as well as a window replacement project. The entire second floor has been updated as well as parts of the first floor.

Findings/Recommendations:

- a. Both Automotive and Mechanical Technology spaces are antiquated and inefficient.
- b. Lupton is now awaiting three major upgrades: new windows, new HVAC system and new copper roof.
- c. Room 138 complex is currently slated for various office moves.
- d. Dean's office in 138 is not appropriate use of the space, and is currently under review. Could be candidate for ITSC project. Could reorganize 136/139 area as possible office space for new technical assistant in Construction Department
- e. Rms 124A, 124B, 130 underutilized and could be utilized as regularly scheduled classrooms.
- f. Rm 121 Diesel Engine Lab underutilized and should be repurposed.
- g. Rm 119 Automotive Lab should be reconfigured possibly freeing up automotive storerooms through the building
- h. Relocate occupants of Rms 103, 104, 106 to free space for Dean of Engineering suite
- i. IRTT office space on second floor only partially occupied. Study entire IRTT complex, equipment underutilized and obsolete.
- j. Rm 169 currently unoccupied – planned space for Mechanical Dept suite with Chairperson and secretary. Large space for more than one office.
- k. Rm 146 vacant and awaiting rehab. Planned space for new staff in new Health Sciences curricula.
- l. Construction Engineering suite 261 large office spaces.
- m. Rm 137A lab not utilized
- n. Rm 187 is a large space and could be converted to two-person faculty office
- o. Vacant double office near 137A space could be utilized.
- p. Relocate Festo equipment from Rm 186 and convert back to small classroom.
- q. T101 needs cosmetic rehab once the flat roof is replaced.
- r. Many offices in Construction Engineering suite 261 are large and could be doubled.
- s. Convert Rm 140 to double faculty office once Construction Engineering Tech retires

13. Memorial Hall

Year Constructed: 1950

Last Major Rehab: N/A

Gross Sq Ft: 12,569

Two story brick building constructed as a single occupancy dormitory accommodating 45 residents.

Findings/Recommendations:

- a. The roof was recently replaced and a window replacement project is needed.
- b. The building could use a complete interior paint job and some cosmetic upgrades to the bathroom facilities.
- c. A review of the space suggests some duplication of functions and some underutilized areas that could be repurposed to gain additional faculty space.
- d. Reassign adjunct offices to full-time faculty use
- e. Consolidate mail rooms and conference rooms in this building to free up rooms for full-time faculty offices

14. Nold Hall

Year Constructed: 1972

Last Major Rehab: 2014/2017

Gross Sq Ft: 97,236

Constructed to serve as the campus Athletic & Physical Education facility. The functionality of the building changed once the college no longer offered Physical Education as an educational program. A total rehab of the building was undertaken with removal of the swimming pool, upgrading HVAC systems and reconfiguring the locker rooms to meet Title IX requirements. This project also provided three large classrooms. The 2017 rehab concentrated on the field cage space and provided new seating and indoor athletic track and multi-sport flooring including a wood main basketball court.

Findings/Recommendations:

- a. Move Sports Management to an underutilized classroom in Nold.

15. Roosevelt Hall

Year Constructed: 1965

Last Major Rehab: N/A

Gross Sq Ft: 72,661

One story brick and reinforced concrete structure was built to be the campus Phys Ed building and auditorium. It quickly became evident that the building's round footprint was not functional for Phys Ed and Athletics so plans were begun for Nold Hall. The building was then reassigned to be a student activities, tavern (Ram's Den) student lounge (Loft Lounge) and student related offices were added. Bowling alley, rifle range and a recreation room were constructed in the previously unfinished basement. The building was never designed to be a student activity center and was recently replaced with the Campus Center and Conklin Hall.

Findings/Recommendations

- a. Planning is underway to completely rehabilitate the building into a public service facility.
- b. Continue limited use while funding issues are resolved.
- c. Construct centralized adjunct office space in former student activities
- d. Relocate LI-RAEN to Roosevelt.
- e. Relocate Building Manager to space adjacent to lobby.

16. School of Business

Year Constructed: 2012

Last Major Rehab: N/A

Gross Sq. Ft: 39,118

A three story academic building consisting of classrooms, lecture halls, offices and student lounge spaces.

Findings/Recommendations:

- a. The building is in excellent condition and there are no pending projects for this facility
Relocate adjuncts Rm 112 to new Roosevelt adjunct space
- b. Relocate advisors currently Rms 108, 109, 111 into Rm 112 creating 3 new faculty offices. This is some concern that 112 is not large enough to accommodate three cubicles.
- c. Relocate Instructional Support Technical Office to Whitman
- d. School of Business is short on office space and management is requesting student lounges be changed to faculty offices. This would not be an appropriate use of the space.

17. Sinclair Hall

Year Constructed: 1970

Last Major Rehab: 2010

Gross Sq Ft: 43,444

Two story reinforced concrete building, originally called Dewitt Clinton Hall was built along with the four stage XII dormitories (Smith, Dewey, Lehman & Hughes) to serve as the main residence dining hall. When constructed it was over built as the college was planning to greatly increase the resident population. Resident dining was eventually moved to Knapp Hall and Sinclair became surge space for the Nathan Hale rehab project.

Findings/Recommendations:

- a. The building is in good condition however if any major reconstruction of the main floor is planned a large asbestos abatement project will be needed.
- b. The 2nd floor contains 8 large classrooms and some faculty offices that are now partially occupied by Criminal Justice and a large center kitchen space that could be rehabilitated into useful space.
- c. Accounts Payable offices underutilized and should be relocated, possibly back to Whitman. Use vacated space for faculty offices. This space would accommodate eight faculty and a reception area.
- d. Liberty Partnerships and LI-RAEN are currently in large underutilized office space. Relocate LI-RAEN to Roosevelt and Liberty possibly to Knapp along with other support programs such as TRIO.
- e. Possible relocation of Residence Life to Dewey or Orchard if resident student population continues to decline.
- f. Original kitchen space on 2nd floor not utilized at all. Continue program study for rehabilitation of this area for other needs, bathrooms, etc.
- g. Consider relocating UUP to Sinclair from Ward Hall.
- h. Remove underutilized research lab equipment from Rm 215
- i. Double up faculty in large oversized offices
- j. Relocate College Prep at Risk, Rm 204, to more appropriate location
- k. Convert Rm 206, gallery reception, into double faculty office
- l. Use Rms 201, 203, 205, 207, 211, 215 for class/lab space. Possibly for Criminal Justice, Security Systems and Law Enforcement Technology.

- m. Review the utilization of rooms 211 and 212 by School of Business, consolidate to one room or relocate elsewhere if space is needed for Criminal Justice expansion into second floor.

18. Thompson Hall

Year Constructed: 1935

Last Major Rehab: N/A

Gross Sq Ft: 32,084

Two story brick building constructed as a classroom and administrative building. A small two story addition was added for dairy labs and a milk processing facility several years later. This building was also the location of the original campus library. Administration eventually moved to the newly constructed Laffin Hall and Thompson became strictly faculty offices and classrooms.

Findings/Recommendations:

- a. The exterior was recently renovated but the interior is in need of a major upgrade.
- b. Relocate Research Institute to Ward Hall.
- c. Rm 108 Social Science Research Institute conference room should also be utilized for seminar type classes.
- d. Rm 113 classroom underutilized, should be scheduled more.
- e. Rm 125, former food lab underutilized. STEM mobile lab currently stored in this space and should be moved to a more appropriate location and possibly rehab the room for additional classroom space.
- f. Reclaim Assemblyman Lupinacci's office 126.
- g. Relocate adjuncts currently in Rm 206 to Roosevelt.
- h. Rms 203 and 211 faculty office can be doubled instead of single occupant
- i. Room 226 conference room should be converted to faculty offices or converted to a regular classroom
- j. Room 219 drafting lab could be utilized as a regular classroom
- k. Some extra space possibly available within the University in the High School offices.

19. Ward Hall

Year Constructed: 1914

Last Major Rehab: outdoor-2017

Sq. Ft: 13,277

Three story brick building originally constructed as women's dormitory. In the 1950's it became a faculty office building and housed laboratories for both Nursing and Dental Hygiene departments until completion of Gleeson in early 1980's. The 'Great Room', originally the living room of the dormitory, has been restored.

Findings/Recommendations:

- a. The exterior of this building was totally renovated in 2017 and is in excellent condition
- b. First floor has limited office space, currently housing Alumni Relations and UUP. Relocate UUP, possibly construct bathroom facilities in this space.
- c. Large offices and open spaces on 2nd floor underutilized with current occupants. Can be reconfigured for use by other departments.
- d. Third floor underutilized. This space can provide 10 faculty offices and a conference room. Aviation Department has been relocated to Lupton, however 3 Aviation personnel remain. Relocate remaining Aviation personnel back to Lupton leaving entire floor as available office space.

- e. **Note:** Ward Hall upper floors are not handicapped accessible. Consider moving functions to the third floor that don't need to interact with students or other campus personnel.
- f. Main floor needs accessible bathroom facilities.

20. Whitman Hall

Year Constructed: 1964

Last Major Rehab: N/A

Sq Ft: 81,871

Two story brick and concrete building originally built as classroom/laboratory building and library. In early 1970's the library function moved to the newly constructed Greenley Hall and the space was converted to the campus business office. Physics labs and Secretarial Science occupied most of the first and second floors and the basement housed a fully functional morgue for the Mortuary Science Program

Findings/Recommendations:

- a. There is currently a rehab project underway to construct 3 computer labs in the basement along with new restrooms.
- b. The elevator is also being replaced.
- c. Exterior is in good condition, interior is in need of minor rehabilitation.
- d. Math Center is underutilized.
- e. Convert adjunct space in Math Center to tutoring center.
- f. Rm 124 Business Lab underutilized. Add to regularly scheduled lab space.
- g. Rm 114 to become Chairman's office in Fall 2018
- h. Rm 116 to become faculty office
- i. Rm 118 to become mail and conference room
- j. Relocate Criminal Justice and Law Enforcement Offices and Labs (possibly to Sinclair)

B.3 FACILITIES ASSESSMENT

Labs and Special Rooms

INVENTORY AND ANALYSIS OF UTILIZATION OF LABORATORIES AND SPECIAL ROOMS: Instructional space used for "wet labs", computer labs, and drafting/studio Labs are listed by building with numbers of sections scheduled/semester, usage by department, capacity, and reasons for underutilization. Many courses using labs have course times that extend past the traditional block schedule. For example, a lab room used only 4x per day in blocks of 2 hours is being utilized 8 hours of the day.

C.2 OFFICE SPACE – SCHOOL OF ARTS AND SCIENCES ASSESSMENT **Plans for Full-Time Faculty Space**

Recommendations for Creating Additional Full-Time Faculty Offices in Buildings Occupied by Arts & Sciences

1. **Hale Hall west wing:** occupied by the Biology Department and Information Technology
 - a. BIO:
 - i. Full-time faculty and staff occupy 18 offices (every feasible location)
 - ii. One adjunct office Hale 116: very small & specialized for this purpose, heavily utilized—not suitable for full-time faculty office
 - iii. Conference Room Hale 126
 - iv. Photocopier/File Room Hale 127
 - v. Student Resource Room Hale 114
 - b. IT: Gary Glueckert occupies Hale 118
 - c. Recommendation: convert Hale 114 Student Resource Room into 2 offices
 - d. Net gain = 2 full-time faculty offices

2. **Knapp Hall second floor:** occupied by English/Humanities, Professional Communications, Psychology; shared Conference Room Knapp 33
 - a. EGL:
 - i. Full-time faculty and staff occupy 14 offices
 - ii. Three adjunct offices Knapp 21, 36, 37
 - iii. Photocopier room Knapp 16
 - b. PCM:
 - i. Full-time faculty and staff occupy 5 offices, including large room (Knapp 33A) shared by secretary and chair
 - ii. One adjunct office Knapp 30
 - c. PSY:
 - i. Full-time faculty and staff occupy 5 offices, including very large office for secretary
 - ii. One adjunct office Knapp 22
 - iii. Conference room Knapp 11
 - d. Recommendations:
 - i. PCM area:
 1. Subdivide Knapp 33A into 2 offices for PCM faculty use
 2. Convert Knapp 30 into PCM secretary office
 3. Relocate future PCM department chair to Knapp 34
 4. Result = gain of 2 offices, making 7 offices available for secretary and 6 faculty (including department chair) planned for the department
 - ii. Remainder of building:
 1. Convert adjunct offices Knapp 21, 22, 36, and 37 to full-time faculty offices
 - iii. Net gain = 6 full-time faculty offices

- iv. (Internal reconfiguration of Psychology suite of rooms could yield additional full-time faculty offices for that department, but these do not involve adjunct offices)
3. **Lupton Hall north-east wing of second floor:** occupied by Chemistry and Physics
- a. CHM:
 - i. Full-time faculty and staff occupy 6 offices
 - ii. Two adjunct offices Lupton 216M, 216N
 - iii. Photocopier room Lupton 216D
 - iv. Conference room Lupton 216K
 - v. Unused space in large main office
 - b. PHY:
 - i. Full-time faculty and staff occupy 12 offices
 - ii. One adjunct office Lupton 200E
 - iii. Conference room Lupton 201
 - c. Recommendations:
 - i. Convert Chemistry photocopier room Lupton 216D into 1 office (move photocopier into unused space in main office)
 - ii. Convert adjunct offices Lupton 216M, 216N, and 200E to full-time faculty offices
 - iii. Net gain = 4 full-time faculty offices
4. **Memorial Hall first floor:** occupied by Liberal Arts & Sciences, Science, Technology & Society, and Sociology/Anthropology
- a. LAS:
 - i. Full-time faculty and staff occupy 3 standard offices (2 of these offices occupied by department chair: Memorial 135 + 135A)
 - ii. Secretary occupies extremely large office Memorial 100 which is also utilized as a conference room
 - iii. Advising rooms Memorial 104, 105, 106
 - iv. Large waiting room Memorial 102
 - b. SOC:
 - i. Full-time faculty and staff occupy 8 standard offices (2 of these offices occupied by Mebane-Cruz: Memorial 132 + 133)
 - ii. Mailroom Memorial 122
 - c. STS:
 - i. Full-time faculty and staff occupy 3 standard offices
 - ii. Advising rooms Memorial 107, 108, 113
 - iii. Waiting room (standard office) Memorial 114
 - d. Recommendations:
 - i. Subdivide Memorial 100 into two rooms: LAS secretary and main office (present usage) and a student waiting room
 - ii. Convert Memorial 102 into a conference room for the building and mailroom for the first floor
 - iii. Convert SOC mailroom Memorial 122 into a full-time faculty office

- iv. Subdivide Memorial 135 and 135A into two standard offices for full-time faculty
 - v. Subdivide Memorial 132 and 133 into two standard offices for full-time faculty
 - vi. Net gain = 3 full-time faculty offices
5. **Memorial Hall second floor:** occupied by History, Politics & Geography, Modern Languages, Sociology/Anthropology, and the Employee Assistance Program
- a. HPG:
 - i. Full-time faculty and staff occupy 11 offices
 - ii. One adjunct office Memorial 229
 - iii. GIS Minilab Memorial 228
 - iv. Conference Room Memorial 233
 - v. Mailroom Memorial 220
 - b. MLG:
 - i. Full-time faculty and staff occupy 5 offices
 - ii. Two adjunct offices Memorial 206, 216
 - iii. Tutoring Room Memorial 200
 - iv. Conference Room Memorial 202
 - v. Mailroom Memorial 203
 - c. SOC: One adjunct office Memorial 211
 - d. EAP: Kathy Devine occupies Memorial 213
 - e. Recommendations:
 - i. Relocate the Employee Assistance Program to a more private location (Sinclair Hall first floor?), freeing Memorial 213 for full-time faculty office
 - ii. Convert adjunct offices Memorial 206, 211, 216, and 229 to full-time faculty offices
 - iii. Eliminate second floor mailrooms Memorial 203 and Memorial 220, freeing two rooms for full-time faculty offices
 - iv. Eliminate second floor conference rooms Memorial 202 and 233, freeing two rooms for full-time faculty offices
 - v. Net gain = 9 full-time faculty offices
6. **Sinclair Hall second floor:** occupied by Criminal Justice plus various other temporary offices
- a. CRJ:
 - i. Full-time faculty and staff occupy 4 offices
 - ii. One adjunct office Sinclair 217—an interior room not suitable for a full-time faculty office
 - b. Recommendations:
 - i. Because CRJ is largely self-contained in Sinclair Hall, the primary recommendations are for reconfiguring available space to accommodate one additional faculty member in the fall of 2018 and more new faculty when its new baccalaureate program begins accepting students. Some options are to:

1. Subdivide a small classroom (Sinclair 201?) into 3 full-time faculty offices
2. Designate an available office space (Sinclair 204?) as a combination mailroom/secretarial room
3. Designate Sinclair 202 as a combination chair's office and conference room
4. Assign available classrooms (Sinclair 203 and/or Sinclair 215) for development into instructional space for the new CRJ program

7. **Whitman Hall southwest corner of first floor:** occupied by Mathematics

a. MTH:

- i. Full-time faculty and staff occupy 12 offices
- ii. Large interior adjunct office Whitman 186A
- iii. Mathematics Mailroom Whitman 186A
- iv. Center for Applied Mathematical Sciences Whitman 138
- v. Mathematics Learning Center Whitman 181
- vi. Mathematics Computer Lab Whitman 182
- vii. Mathematics Conference Room Whitman 185

b. Recommendations:

- i. Because MTH is largely self-contained within its designated space in Whitman Hall, it would be expected that internal reconfiguration would be done to accommodate any growth in the number of faculty in this department
- ii. The Mathematics adjunct office in Whitman 186A appears to be underutilized, but the question is whether it is suitable for full-time office space, and how many offices could be created by subdividing it.
- iii. Two options to consider:
 1. Subdivide this space for full-time faculty offices—at least 4 and possibly 6
 2. Open this space to adjunct faculty in other departments in the building (Computer Systems, Security Systems/Law Enforcement Technology)

Net gain of 24 full-time faculty offices if all of the above recommendations were implemented (with an additional 6 possible in Whitman 186A)

D. CONSTRUCTION

Impact of Construction Projects Current and Planned

Knapp Kitchen Rehab

- a. Phase 1 - beginning April 2018 will create noise and dust that will affect Faculty offices on the second floor.
- b. Phase 2 - will cause the large central "study" room to be taken off line and will limit access to the main floor bathrooms.
- c. Phase 3 - The final use of this rehabilitated space is not yet determined but will not likely be completed until summer of 2021.

Greenley Third Floor

- a. Asbestos abatement project has been completed.
- b. Construction of the interconnecting stairway will cause noise and dust (scheduled to start in the summer of 2018).

Whitman Lower Level

- a. Asbestos abatement is about to begin. Construction will cause noise issues for the occupants of the floor above.
- b. Replacement of the existing elevator will necessitate some relocations as the second floor will not be accessible for at least 12 weeks.
- c. This project will yield 3 new open computer labs.

Lupton Hall

- a. I.T.S.C. - INFRASTRUCTURE TRANSPORTATION SECURITY CENTER - This project is a SUNY 20/20 grant and will cause some relocations in and around Lupton Hall. The exact scope of this project is not yet been determined.
- b. 3 Critical Maintenance Projects - Roof Replacement, Window Replacement and HVAC Replacement - will be highly disruptive to the operation of Lupton Hall. The exact timing and scope have yet to be finalized.

Roosevelt Hall

- a. Rehab will create office space for a number of non-academic departments, the exact list of candidates is still to be determined.
- b. During construction the following occupants will need to be relocated - Veterans, ROTC, Disabled Student Services, Backstage Theatre, Campus Recreation.
- c. This project will also eliminate the fitness center and the meditation room.
- d. Little Theatre will also be unavailable during the project.
- e. Construction of this project is expected to take 30 to 36 months.

B.A.S.S.

- a. Once the funding is approved construction of the Building for Applied Social Science is expected to take 30 months.
- b. This facility will free up space in several campus buildings, including Memorial & Knapp Hall.

E.1. PARKING

Current Parking:

The majority of campus parking is located to the north and west of the campus core. The recent addition of the School of Business, and the planned Building of Applied Social Sciences has made it desirable to add new parking areas to the east side of campus. The attached map illustrates the current proximity of parking to the campus core. The most remote parking spots are less than a 5 minute walk from the center of campus.

The parking count as of spring 2018 is a total of 3,974 and is distributed as follows:

Permanent paved spaces: 3,414

- a. Gravel spots: 150 N. Side, 60 Orchard: 210
- b. Grass/dirt spots: 350

There are two projects planned that will add 458 new parking spots to campus for a total of 4,432 spots. It is anticipated these projects will not be completed until start of the 2021 fall semester at which time our enrollment is expected to be approximately 7801 FTE (based on 1 1/2%) yearly growth.

- a. Elimination of the gravel spots by Orchard hall the
- b. Removal of the dangerous head-in parking along Orchard Road.

Planning

- a. Campus planning standards suggest 1 parking spot per 4.5 FTE. This would recommend only 1,633 spots are required but given the high percentage of commuter students (93%) we could double this ratio, giving us a need for 3,365 spaces in spring 2018, 3,467 spots for fall of 2021.
- b. At this time there is a parking shortage on Monday and Wednesday from 11am until 2pm and on Tuesday and Thursday from 12:30 until 2:30pm. At all other times there are plenty of spots available. On Fridays the majority of parking spots are unoccupied.

Funding:

- a. The State University Construction Fund does not financially support the construction of parking spaces, any additional parking would need to be paid with with campus funds.
- b. A typical parking project is estimated to cost \$20.00 / sf. ft. A typical space, including road access needs about 350 sq. ft. which equals \$7,000.00 / space. One acre of land could provide 120 parking spots and would cost \$840,000. Depending on the complexity of lighting, drainage and landscaping this cost could easily exceed \$1,000,000 per 120 spots.
- c. Parking garages are also a possibility and consume considerably less land however the cost of such structures is in the vicinity of \$25,000.00 per space. This would equate to approx. \$3,000,000.00 for the same 120 spots on ground parking.

Other Considerations:

- a. The college has traditionally not charged Faculty and Staff a parking fee, however this would be one way to fund additional parking spaces.
- b. Make desirable parking lots into preferred parking and charge premium fee's.
- c. Prohibit freshman resident students from having vehicles on campus. This could potentially free up 100 or more parking spaces.
- d. The simplest way to alleviate the parking shortage is to adjust the class schedule to stagger the peak parking

E.2 PARKING RECOMMENDATIONS

- a. The campus should proceed with the two parking projects currently in design which will provide an additional 458 spots. These spots will not be available until the start of the fall 2021 semester.
- b. In addition, the college should consider extending the existing Lot 3 to the northwest which would yield nearly 300 new spots. This would need to be paid for with campus funds. A study should be undertaken to establish a budget and schedule for this project. (see attached map). This project would impact the athletic fields presently in this area. If these fields are still necessary they could be located in the vicinity of the golf driving range.
